

Human Risk Management Platform (SaaS)

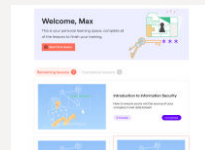

Curriculum (annual / on induction)

1. Initial Assessment

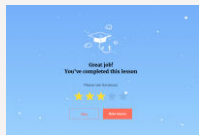

Risk, perception and knowledge test questions

2. Dynamic Module Allocation

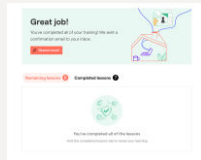

Modules dynamically assigned to each employee, based on role and training needs

3. Module Completion

At the end of each module submit feedback and rate them. (measure intention to comply)

4. Course Completion

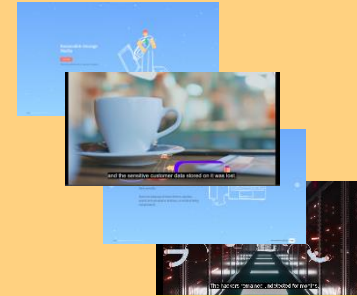

Once all modules are complete the Final Assessment is triggered

5. Final Assessment

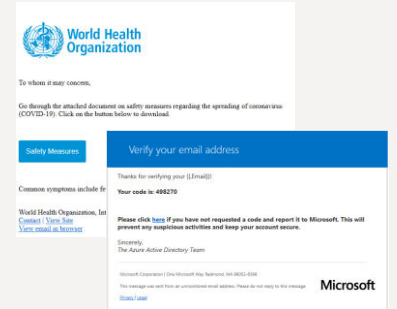

Risk, perception and knowledge test questions

Ongoing

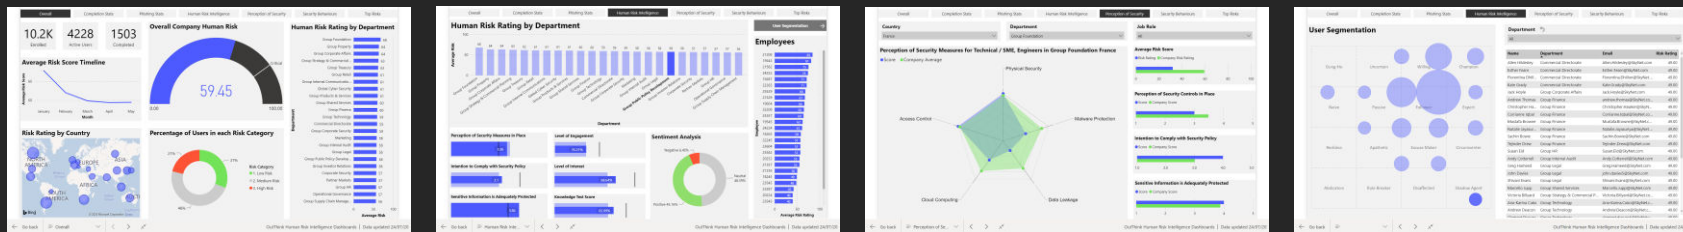

Improvement actions delivered, based on the human risk intelligence collected.

Phishing Simulations

Users click or report phishing simulations. Training is delivered to those who click. Data is fed into the human risk score.
